Two moons on August 27 - As most of you have probably figured out this was a HOAX. It started in 2003 with an email that had the correct information but as it was rewritten over the weeks that followed much was left out and it has grown more each year. If back in August of 2003 you were looking at Mars with a telescope of 72x power, the view in the eye piece would have been the equivalent of looking at our moon with the unaided eye.

Lion Spencer Smith won the surprise bag auction.

Lion Barbara Smith was present for the meal drawing.
